### **Information Concerning Investment Risk**

**Noteholders and prospective purchasers of Notes should ensure that they understand the nature of the Notes and the extent of their exposure to risk and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition. The amount payable on redemption of the Notes is linked to the performance of the Underlying (as defined herein), and may be less than par. Given the highly specialised nature of these Notes, Morgan Stanley B.V. (the "Issuer"), Morgan Stanley ("the Guarantor") and Morgan Stanley & Co. International plc ("MSI plc") consider that they are only suitable for highly sophisticated investors who are able to determine for themselves the risk of an investment linked to the Underlying, are willing to take risks and can absorb the partial loss of their initial investment. Consequently, if you are not an investor who falls within the description above you should not consider purchasing these Notes without taking detailed advice from a specialised professional adviser.**

**Potential investors are urged to consult with their legal, regulatory, investment, accounting, tax and other advisors with regard to any proposed or actual investment in these Notes. Please see the Offering**

Circular together with the Pricing Supplement for a full detailed description of the Notes and in particular, please review the Risk Factors associated with these Notes. Investing in the Notes entails certain risks including, but not limited to, the following:

**Capital is not protected:** the final redemption amount depends on the performance of the Underlying and could be zero.

**Adjustments by the Determination Agent:** The terms and conditions of the Notes will allow the Determination Agent to make adjustments or take any other appropriate action if circumstances occur where the Notes or any exchanges are affected by market disruption, adjustment events or circumstances affecting normal activities.

In addition, other circumstances may occur which either increase the liability of the Issuer fulfilling its obligations under the Notes or increase the liability of any hedging activities related to such obligations, including without limitation the adoption of or any change in any tax law relating to a common system of financial transaction tax in the European Union or otherwise.

In such circumstances, the Determination Agent can in its sole and absolute discretion determine whether to redeem the Notes early, or adjust the terms of the Notes, which may include without limitation adjustments to the Initial Reference Level, the Final Redemption Amount or the Underlying. The Determination Agent also has the discretion to make adjustments with respect to any corporate action.

Potential investors should see the Offering Circular for a detailed description of potential adjustment events and adjustments.

**Administrator/Benchmark Event:** The administrator or sponsor of an Underlying (or the Underlying itself) may be required to be authorised, registered, recognised, endorsed, the subject of an equivalence decision, approved or otherwise included in an official register in order for the Issuer or the Determination Agent to be permitted to use it and perform their respective obligations under the Notes. If the Determination Agent determines that such a requirement applies to the administrator or sponsor (or the Underlying) but it has not been satisfied then an “Administrator/Benchmark Event” will occur and the Determination Agent or the Issuer may then apply certain fallbacks. These fallbacks may mean that the Determination Agent makes adjustments to the terms of the Notes, including substitution of the relevant Underlying with the ‘Alternative Pre-nominated Index’ (if any) specified for the Underlying, or to redeem the Notes.

Potential investors should see the Offering Circular for a detailed description of what constitutes an Administrator/Benchmark Event and the applicable ‘fallback’ provisions that may apply if such event occurs.

**Exit Risk:** Any secondary market price of the Notes will depend on many factors, including the value and volatility of the Underlying(s), interest rates, the dividend rate on the stocks that compose the Underlying (if any), time remaining to maturity and the creditworthiness of the Issuer and/or the Guarantor. The secondary market price may be lower than the market value of the issued Notes as at the Issue Date to take into account amounts paid to distributors and other intermediaries relating to the issue and sale of the Notes as well as amounts relating to the hedging of the Issuer's obligations. As a result of all of these factors, the holder may receive an amount in the secondary market which may be less than the then intrinsic market value of the Note and which may also be less than the amount the holder would have received had the holder held the Note through to maturity.

**Credit Risk:** Investors are exposed to the credit risk of the Issuer and/or Guarantor. The Notes are essentially a loan to the Issuer with a repayment amount linked to the performance of the Underlying that the Issuer promises to pay at maturity and that the Guarantor promises to pay if the Issuer fails to do so. There is the risk, however, that the Issuer and the Guarantor may not be able to fulfill their obligations, irrespective of whether the Notes are referred to as capital or principal protected. Investors may lose all

or part of their investment if the Issuer and the Guarantor are unable to pay the coupons (if any) or the redemption amount. No assets of the Issuer and/or Guarantor are segregated and specifically set aside in order to pay the holders of the Notes in the event of liquidation of the Issuer and/or Guarantor, and the holders of the Notes will rank behind secured or preferred creditors.

**Liquidity Risk:** Any secondary market in the Notes made by the Dealer or its affiliates will be made on a reasonable efforts basis only and subject to market conditions, law, regulation and internal policy. Even whilst there may be a secondary market in the Notes it may not be liquid enough to facilitate a sale by the holder.

**Product Market Risk:** The value of the Notes and the returns available under the terms of the Notes will be influenced and dependent on the value of the Underlying. It is impossible to predict how the level of the Underlying will vary over time. The historical performance (if any) of the Underlying is not indicative of its future performance.

**Hedging Risk:** On or prior to and after the Trade Date, the Issuer, through its affiliates or others, will likely hedge its anticipated exposure under the Notes by taking positions in the Underlying(s), in option contracts on the Underlying(s) or positions in any other available securities or instruments. In addition, the Issuer and its affiliates trade the Underlying(s) as part of their general businesses. Any of these activities could potentially affect the value of the Underlying(s), and accordingly, could affect the pay-out to holders on the Notes.

**Adjustment and Discontinuation Risk:** The Sponsor of the Underlying can add, delete or substitute stocks constituting the Underlying or make other methodological changes that could change the value of the Underlying without regard to the interests of holders of the Notes. Any of these decisions/determinations may adversely affect the value of the Notes and may result in the investor receiving a return that is materially different from what he/she would have received if the event had not occurred

**No Shareholder Rights:** A holder of Notes will have no beneficial interest in the stocks that compose the relevant Underlying nor any voting rights and will not have the right to receive dividends or other distributions with respect to the stocks that compose the Underlying.

**Underlying Sponsor Risk:** The sponsor of the relevant Underlying is not an affiliate of the Issuer or its affiliates and is not involved with this offering in any way. Consequently, the Issuer and the Determination Agent have no ability to control the actions of the sponsor of the relevant Underlying, including and rebalancing that could trigger an adjustment to the terms of the Notes by the Determination Agent.

**Potential Conflict of Interest:** The Determination Agent, which is an affiliate of the Issuer, will determine the payout to the investor at maturity. Morgan Stanley & Co. International plc and its affiliates may trade the Underlying on a regular basis as part of its general broker-dealer business and may also carry out hedging activities in relation to the Notes. Any of these activities could influence the Determination Agent's determination of adjustments made to any Notes and any such trading activity could potentially affect the price of the Underlying and, accordingly, could affect the investor's payout on any Note.

In purchasing any Notes, purchasers will be deemed to represent and undertake to the Issuer, the Dealer and each of their affiliates that (i) such purchaser understands the risks and potential consequences associated with the purchase of the Notes, (ii) that such purchaser has consulted with its own legal, regulatory, investment, accounting, tax and other advisers to extent it believes is appropriate to assist it in understanding and evaluating the risks involved in, and the consequences of, purchasing the Notes and (iii) in accordance with the terms set out in Annex 2.

Morgan Stanley is not qualified to give legal, tax or accounting advice to its clients and does not purport to do so in this document. Clients are urged to seek the advice of their own professional advisers about the consequences of the proposals contained herein.
