This summary contains that information from the summary set out in the base prospectus dated 4 November 2016 (the “Base Prospectus”) which is relevant to the Notes together with relevant information from the Final Terms. This summary must be read as an introduction to the Base Prospectus and is provided as an aid to investors when considering whether to invest in the Notes, but is not a suitable substitute for the Base Prospectus. Any decision to invest in the Notes should be based on a consideration of the Base Prospectus as a whole, including any documents incorporated by reference, and the Final Terms. Following the implementation of the relevant provisions of the Prospectus Directive (2003/71/EC, as amended) in each Member State of the European Economic Area, no civil liability will attach to those persons who have tabled this summary in any such Member State solely on the basis of this summary, including any translation thereof herein, unless it is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus and the Final Terms or it does not provide, when read together with the other parts of the Base Prospectus and the Final Terms, key information (as defined in Article 2.1(s) of the Prospectus Directive) in order to aid investors when considering whether to invest in the Notes. Where a claim relating to information contained in the Base Prospectus and the Final Terms is brought before a court in a Member State of the European Economic Area, the plaintiff may, under the national legislation of the Member State where the claim is brought, be required to bear the costs of translating the Base Prospectus before the legal proceedings are initiated.

Summaries are made up of disclosure requirements known as Elements. These elements are numbered in Sections A - E (A.1-E.7).

This Summary contains all the Elements required to be included in a summary for this type of securities and issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of securities and issuer, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element is included in the summary with the mention of “not applicable”.
