This document constitutes the Pricing Supplement relating to the issue of Notes described herein. Terms used herein shall be deemed to be defined as such for the purposes of the Terms and Conditions of the English Law Notes set forth in the Offering Circular dated 18 August 2014 and the supplemental Offering Circulars dated 29

September 2014, 28 November 2014, 4 June 2015 and 30 June 2015 (together the "**Offering Circular**"). This Pricing Supplement must be read in conjunction with such Offering Circular. Full information on the Issuer and the offer of the Notes is only available on the basis of the combination of this Pricing Supplement and the Offering Circular. Copies of the Offering Circular are available from the offices of Morgan Stanley & Co. International plc at 25 Cabot Square, Canary Wharf, London, E14 4QA. Information Concerning Investment Risk

Noteholders and prospective purchasers of Notes should ensure that they understand the nature of the Notes and the extent of their exposure to risk and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition. The amount payable on redemption of the Notes is linked to the performance of the Underlying (as defined herein), and may be less than par. Given the highly specialised nature of these Notes, Morgan Stanley (the "Issuer") and Morgan Stanley & Co. International plc ("MSI plc") consider that they are only suitable for highly sophisticated investors who are able to determine for themselves the risk of an investment linked to the Underlying, are willing to take risks and can absorb the partial or complete loss of their initial investment. Consequently, if you are not an investor who falls within the description above you should not consider purchasing these Notes without taking detailed advice from a specialised professional adviser.

Potential investors are urged to consult with their legal, regulatory, investment, accounting, tax and other advisors with regard to any proposed or actual investment in these Notes. Please see the Offering Circular for a full detailed description of the Notes and in particular, please review the Risk Factors associated with these Notes.

Adjustments by the Determination Agent: The terms and conditions of the Notes will allow the Determination Agent to make adjustments or take any other appropriate action if circumstances occur where the Notes or any exchanges are affected by market disruption, adjustment events or circumstances affecting normal activities. In addition, other circumstances may occur which either increase the liability of the Issuer fulfilling its obligations under the Notes or increase the liability of any hedging activities related to such obligations, including without limitation the adoption of or any change in any tax law relating to a common system of financial transaction tax in the European Union or otherwise. In such circumstances, the Determination Agent can in its sole and absolute discretion determine whether to redeem the Notes early, or adjust the terms of the Notes, which may include without limitation adjustments to the Initial Reference Level, the Final Redemption Amount or the Underlying. The Determination Agent is not required but has the discretion to make adjustments with respect to each and every corporate action. Potential investors should see the Offering Circular for a detailed description of potential adjustment events and adjustments.

Adjustment and Discontinuation Risk: The Sponsor of the Underlying can add, delete or substitute stocks constituting the Underlying or make other methodological changes that could change the value of the Underlying without regard to the interests of holders of the Notes. Any of these decisions/determinations may adversely affect the value of the Notes and may result in the investor receiving a return that is materially different from what he/she would have received if the event had not occurred.

Basket Components Risk: The Notes will be redeemed at an amount determined by reference to the performance of the Basket Components and such performance will therefore affect the nature and value of the investment return on the Notes. Noteholders and prospective purchasers of Notes should conduct their own investigations and, in deciding whether or not to purchase Notes, prospective purchasers should form their own views of the merits of an investment related to the Basket Components based upon such investigations and not in reliance on any information given in this Pricing Supplement.

Credit Risk: Investors are exposed to the credit risk of the Issuer. The Notes are essentially a loan to the Issuer with a repayment amount linked to the performance of the Underlying that the Issuer promises to pay to you at maturity. There is the risk, however, that the Issuer may not be able to fulfil its obligations, irrespective of whether the Notes are referred to as capital or principal protected. Investors may lose all or part of their investment if the Issuer is unable to pay the coupons (if any) or the redemption amount. No assets of the Issuer are segregated and specifically set aside in order to pay the holders of the Notes in the event of liquidation of the Issuer, and the holders of the Notes will rank behind secured or preferred creditors.

Capital is not protected: the final redemption amount depends on the performance of the Underlying and could be zero.

Exit Risk: Any secondary market price of the Notes will depend on many factors, including the value and volatility of the Underlying, interest rates, the dividend rate on the stocks that compose the Underlying, time remaining to maturity and the creditworthiness of the Issuer. The secondary market price may be lower than the market value of the issued Notes as at the Issue Date to take into account amounts paid distributors and other intermediaries relating to the issue and sale of the Notes as well as amounts relating to the hedging of the Issuer's obligations. As a result of all of these factors, the holder may receive an amount in the secondary market which may be less than the then intrinsic market value of the Note and which may also be less than the amount the holder would have received had the holder held the Note through to maturity.

Currency Exchange Risk: Fluctuations in the exchange rates will affect the value of the Notes and, if payments are made in a currency other than the currency of denomination or the home currency of the investors, the amounts payable under the Notes. Changes in exchange rates relating to any of the relevant currencies of the Notes could result in a decrease in their effective yield and in the investor's loss of all or a substantial portion of the value of that Note or of the amounts payable. The exchange rates are the result of the supply of, and the demand for, the related currencies. Changes in the exchange rate result over time from the interaction of many factors directly or indirectly affecting economic and political conditions in the related countries / member nations, including economic and political developments in other countries. Of particular importance to potential currency exchange risks are: (i) rates of inflation; (ii) interest rate levels; (iii) balance of payments; and (iv) the extent of governmental surpluses or deficits in the relevant country. All of these factors are, in turn, sensitive to the monetary, fiscal and trade policies pursued by the related countries, the governments of the related countries and member nations (if any), and other countries important to international trade and finance. Government intervention could materially and adversely affect the value of the Notes. Foreign exchange rates can be fixed by governmental authority, allowed to float within a range of exchange rates set by governmental authority, or left to float freely. Governments, use a variety of techniques, such as intervention by their central bank or imposition of regulatory controls or taxes, to affect the exchange rates of their respective currencies. They may also issue a new currency to replace an existing currency, fix the exchange rate or alter the exchange rate or relative exchange characteristics by devaluation or revaluation of a currency. Thus, a special risk in purchasing the Notes is that their trading value and amount payable could be affected by the actions of governments, fluctuations in response to other market forces and the movement of currencies across borders. Suspension or disruptions may adversely affect the value of the Notes. Currency markets are subject to temporary distortions or other disruptions due to various factors, including lack of liquidity, participation of speculators and government intervention. As a result, the market value of the Notes could be adversely affected. Even though currencies trade around-the-clock, the Notes will not. The interbank market in foreign currencies is a global, around-the-clock market. The hours of trading for the Notes will not conform to the hours during which the related currencies are traded. Significant price and rate movements may take place in the underlying foreign exchange markets that will not be reflected immediately in the price of the Notes.

Liquidity Risk: Any secondary market in the Notes made by the Dealer will be made on a reasonable efforts basis only and subject to market conditions, law, regulation and internal policy. Even whilst there may be a secondary market in the Notes it may not be liquid enough to facilitate a sale by the holder.

Hedging Risk: On or prior to and after the Trade Date, the Issuer, through its affiliates or others, will likely hedge its anticipated exposure under the Notes by taking positions in the Underlying, in option contracts on the Underlying or positions in any other available securities or instruments. In addition, the Issuer and its affiliates trade the Underlying as part of their general businesses. Any of these activities could potentially affect the value of the Underlying, and accordingly, could affect the payout to holders on the Notes.

No Shareholder Rights: A holder of Notes will have no beneficial interest in the stocks that compose the relevant Underlying nor any voting rights and will not have the right to receive dividends or other distributions with respect to the stocks that compose the Underlying.

Potential Conflict of Interest: The Determination Agent (MSI plc) is an affiliate of the Issuer and the economic interests of the Determination Agent may be adverse to the interests of holders of the Notes.

Determinations made by the Determination Agent may affect the amount payable to holders pursuant to the terms of the Notes.

Underlying Sponsor Risk: The sponsors of the Underlyings are not affiliates of the Issuer or its affiliates and is not involved with this offering in any way. Consequently, the Issuer and the Determination Agent have no ability to control the actions of the sponsors of the Underlyings, including and rebalancing that could trigger an adjustment to the terms of the Notes by the Determination Agent.

TAX CONSIDERATIONS FOR NON-U.S. HOLDERS: A Non-U.S. holder will be subject to U.S. withholding tax unless the beneficial owner of the note (or a financial institution holding the note on behalf of the beneficial owner) furnishes the appropriate Form W-8, on which the beneficial owner certifies under penalties of perjury that it is not a U.S. person. If withholding or deduction of taxes is required by law (regardless of whether a holder furnished an appropriate form), payments on the notes will be made net of applicable withholding taxes, and Morgan Stanley will not be required to pay any additional amounts to Non-U.S. holders with respect to any taxes withheld.

In purchasing any Notes, purchasers will be deemed to represent and undertake to the Issuer, the Dealer and each of their affiliates that (i) such purchaser understands the risks and potential consequences associated with the purchase of the Notes, (ii) that such purchaser has consulted with its own legal, regulatory, investment, accounting, tax and other advisers to extent it believes is appropriate to assist it in understanding and evaluating the risks involved in, and the consequences of, purchasing the Notes and (iii) in accordance with the terms set out in Annex 2.

Morgan Stanley is not qualified to give legal, tax or accounting advice to its clients and does not purport to do so in this document. Clients are urged to seek the advice of their own professional advisers about the consequences of the proposals contained herein.
