If a Credit Event (as being set out in the Physical Settlement Matrix, occurs in respect of the Reference Entities (being those comprising the Markit iTraxx® Itraxx Europe Series 30 Index version 1 (Annex Date 18 September 2018) on the Trade Date) or successor(s), the Calculation Agent may determine that a Credit Event Determination Date has occurred. In this case:

credit linked settlement will not occur until this happens in respect of an amount that is greater than 3.2% of the sum of the Reference Entity Weightings for each Reference Entity in the Index for which a Credit Event Determination Date has occurred and thereafter each relevant Credit Event will further reduce amounts due in respect of the Notes.

The Issuer will then pay the Credit Event Redemption Amount in respect of each Note on the Credit Event Redemption Date.

In addition, interest on the Notes may be reduced or no longer paid depending on the ALP.

Where:

“**Credit Event Redemption Amount**” means:

an amount equal to each Note's *pro rata* share of:

### Section D – Risks

Element	Title
D.2	<p><b>Key risks regarding the Issuer and the Guarantor:</b></p> <p>In purchasing Notes, investors assume the risk that the Issuer and the Guarantor may become insolvent or otherwise be unable to make all payments due in respect of the Notes. There is a wide range of factors which individually or together could result in the Issuer and the Guarantor becoming unable to make all payments due in respect of the Notes. It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuer and the Guarantor may not be aware of all relevant factors and certain factors which they currently deem not to be material may become material as a result of the occurrence of events outside the Issuer's and the Guarantor's control. The Issuer and the Guarantor have identified a number of factors which could materially adversely affect their businesses and ability to make payments due under the Notes. These factors include:</p> <p><b>Risk Factors relating to the Issuer</b></p> <ul style="list-style-type: none"> <li>• The Issuer is dependant on the Guarantor to make payments on the Notes.</li> <li>• Certain considerations in relation to the forum upon insolvency of the Issuer.</li> </ul> <p><b>Factors that may affect the Guarantor's ability to fulfil its obligations under the Guarantee</b></p> <p>Macroeconomic Risks</p> <ul style="list-style-type: none"> <li>• Economic conditions in the countries where the Group operates could have a material adverse effect on the Group's business, financial condition and results of operations.</li> <li>• Since the Group's loan portfolio is highly concentrated in Spain, adverse changes affecting the Spanish economy could have a</li> </ul>

- Exposure to the real estate market makes the Group vulnerable to developments in this market.

#### Legal, Regulatory and Compliance Risks

- Increased taxation and other burdens imposed on the financial sector may have a material adverse effect on BBVA's business, financial condition and results of operations.
- Contributions for assisting in the future recovery and resolution of the Spanish banking sector may have a material adverse effect on the Bank's business, financial condition and results of operations.
- Regulatory developments related to the EU fiscal and banking union may have a material adverse effect on the Bank's business, financial condition and results of operations.
- The Group's anti-money laundering and anti-terrorism policies may be circumvented or otherwise not be sufficient to prevent all

money laundering or terrorism financing.

- The Group is exposed to risk in relation to compliance with anti-corruption laws and regulations and sanctions programmes.

#### Liquidity and Financial Risks

- BBVA has a continuous demand for liquidity to fund its business activities. BBVA may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong.
- Withdrawals of deposits or other sources of liquidity may make it more difficult or costly for the Group to fund its business on favourable terms or cause the Group to take other actions.
- Implementation of internationally accepted liquidity ratios might require changes in business practices that affect the profitability of the Bank's business activities.
- The Group's businesses are subject to inherent risks concerning borrower and counterparty credit quality which have affected and are expected to continue to affect the recoverability and value of assets on the Group's balance sheet.
- The Group's business is particularly vulnerable to volatility in interest rates.
- The Group has a substantial amount of commitments with personnel considered wholly unfunded due to absence of qualifying plan assets.
- BBVA and certain of its subsidiaries are dependent on their credit ratings and any reduction of their credit ratings could materially and adversely affect the Group's business, financial condition and results of operations.
