SECTION B – ISSUER AND GUARANTOR

Element	
B.1	<p>Legal and commercial name of the Issuer <i>Santander International Debt, S.A.U</i></p>
B.2	<p>Domicile / legal form / legislation / country of incorporation The registered office address of the Issuer is Ciudad Grupo Santander, Avenida de Cantabria s/n, 28660 Boadilla del Monte, Madrid, Spain.</p> <p>The Issuer was incorporated in Spain as a limited liability company (<i>sociedad anónima</i>) for an unlimited duration and is subject to the Consolidated Text of Law on Limited Liability Companies 1/2010 dated 2</p>

	<p>July (<i>Texto Refundido de la Ley de Sociedades de Capital</i>) ("Spanish Corporations Law"). The Issuer is a wholly-owned subsidiary of Banco Santander, S.A. (the "Guarantor").</p> <p><i>Santander International Debt, S.A.U. was incorporated in Spain by a public deed on 21 April 2004 and registered in the Mercantile Registry of Madrid on 5 May 2004.</i></p>
<p>B.4b</p>	<p>Trend information</p> <p>The global financial services sector is likely to remain competitive with a large number of financial service providers and alternative distribution channels. Additionally, consolidation in the sector (through mergers, acquisitions or alliances) is likely to occur as other major banks look to increase their market share, combine complementary businesses or strengthen their balance sheets. In addition, regulatory changes will take place in the future that we expect will increase the overall level of regulation in the markets.</p> <p>The following are the most important trends, uncertainties and events that are reasonably likely to have a material adverse effect on the Santander Group or that would cause the disclosed financial information not to be indicative of its future operating results or its financial condition:</p> <ul style="list-style-type: none"> • a continued downturn in the Spanish and the United Kingdom real estate markets, and a corresponding increase in mortgage defaults, which could impact the Group's non performing loans and decrease consumer confidence and disposable income; • uncertainties relating to economic growth expectations and interest rates cycles, especially in the United States, Spain, the United Kingdom, other European countries and Latin America, and the impact they may have over the yield curve and exchange rates; • the continued effect of the global economic slowdown on Europe and the US and fluctuations in local interest and exchange rates; • continued changes in the macroeconomic environment, such as sustained unemployment above historical levels, could further deteriorate the quality of the Group's customers' credit; • increases in the Group's cost of funding, partially as a result of the fragility of the Spanish, Portuguese, Irish and Greek economies, could adversely affect the Group's net interest margin as a consequence of timing differences in the repricing of the Group's assets and liabilities; • the effects of withdrawal of significant monetary and fiscal stimulus programs and uncertainty over government responses to growing public deficits; • continued instability and volatility in the financial markets; • a drop in the value of the euro relative to the US dollar, the sterling pound or Latin American currencies; • inflationary pressures, particularly in Latin America, because of the effect they may have in relation to increases of interest rates and decreases of growth; • increased consolidation of the global financial services sector, which could further reduce the Group's spreads;

	<ul style="list-style-type: none"> • although it is foreseeable that entry barriers to domestic markets in Europe will eventually be lowered, the Group’s possible plans of expansion into other markets could be affected by regulatory requirements of the national authorities of these countries; • acquisitions or restructurings of businesses that do not perform in accordance with the Group’s expectations or that subject the Group to previously unknown risks; • increased regulation, government intervention and new laws prompted by the financial crisis which could change the Group’s industry and require it to modify its businesses or operations; and • the risk of further reductions in liquidity and increases of credit spreads as a consequence of the crisis in the financial markets, which could affect not only the Group’s cost of funding but also the value of its proprietary portfolios and the assets under the management of the Group.
B.5	<p>Description of the Group</p> <p>Both the Issuer and the Guarantor are part of Santander Group (or, the “Group”). The Issuer is an instrumental company of the Guarantor which is the parent entity of the Santander Group. As of 31 December 2012, the Group was made up of 740 companies that consolidate by the global integration method. Its obligations in that respect are contained in the senior guarantee.

Deed of covenant: The Instruments have the benefit of a deed of covenant dated 21 June 2013.

Taxation: All amounts payable in respect of the Instruments, the receipts and coupons and the senior guarantee by the Issuer or the Guarantor will be made free and clear of and without withholding or deduction for or on account of any present or future taxes, duties, assessments or governmental charges of whatever nature imposed or levied by or on behalf of Spain or any political subdivision thereof or any authority or agency therein or thereof having power to tax, unless the withholding or deduction of such taxes, duties, assessments or governmental charges is required by law. In that event, the Issuer or (as the case may be) the Guarantor shall pay such additional amounts as will result in receipt by the holder of any Instrument or coupon of such amounts as would have been received by them had no such withholding or deduction been required.

Under Spanish Law 13/1985 and Royal Decree 1065/2007, each as amended, the Issuer and the Guarantor is required to provide to the Spanish tax authorities certain information relating to the Instruments. If Citibank, N.A., London Branch. (the "**Issue and Paying Agent**") fails to provide the Issuer or, as the case may be, the Guarantor with the required information, the Issuer or the Guarantor (as the case may be) will be required to withhold tax and may pay income in respect of the relevant Instruments net of the Spanish withholding tax applicable to such payments.

None of the Issuer, the Guarantor and Banco Santander International (the **Dealer**) assumes any responsibility therefor.

Events of Default:

Applicable in case of Senior Instruments: Non-payment, breach of other obligations, winding up, cessation of business, insolvency proceedings and arrangements with creditors of the Issuer or the Guarantor and if the senior guarantee ceases to be a valid and binding obligation of the Guarantor.

Governing law:

The issue of the Instruments, including their legal nature (*obligaciones u otros valores que reconozcan o creen deuda*), the status of the Instruments, the status of the guarantee in respect of the Instruments, the capacity of the Issuer, the relevant corporate resolutions and the appointment of the Commissioner and the constitution of the Syndicates of Holders of the Instruments will be

	governed by Spanish law. The terms and conditions of the Instruments, the Issue and Paying Agency Agreement, the Deed of Covenant and, save for, in each case, the status of the guarantee, the <i>Deed of Senior Guarantee</i> and all non-contractual obligations arising out of or in connection with the terms and conditions of the Instruments, the Issue and Paying Agency Agreement, the Deed of Covenant and the <i>Deed of Senior Guarantee</i> , are governed by English law.

SECTION D – RISKS

Element	
D.2	<p>Key risks regarding the Issuer and the Guarantor</p> <p>The Issuer is a finance vehicle established by the Guarantor for the purpose of issuing Instruments under the Programme and on-lending the proceeds within the Santander Group. The Issuer is therefore dependent upon other members of the Group paying interest on and repaying their loans in a timely fashion. Should any Group member fail to pay interest on or repay any loan in a timely fashion this could have a material adverse effect on the ability of the Issuer to fulfil its obligations under Instruments issued. The main risks relating to the Santander Group operation are, amongst others:</p> <ul style="list-style-type: none"> • Since the Group’s loan portfolio is concentrated in Continental Europe, the United Kingdom and Latin America, adverse changes affecting the economies of Continental Europe, the United Kingdom or certain Latin American countries could adversely affect our financial

condition.

- The Group is vulnerable to the current disruptions and volatility in the global financial markets.
- We may suffer adverse effects as a result of the ongoing economic and sovereign debt tensions in the eurozone.
- Our financial results are constantly exposed to market risk. We are subject to fluctuations in interest rates and other market risks, which may materially and adversely affect us.
- Market conditions have, and could result, in material changes to the estimated fair values of our financial assets. Negative fair value adjustments could have a material adverse effect on our operating results, financial condition and prospects.
- If we are unable to effectively control the level of non-performing or poor credit quality loans in the future, or if our loan loss reserves are insufficient to cover future loan losses, this could have a material adverse effect on us.
- Failure to successfully implement and continue to improve our risk management policies, procedures and methods, including our credit risk management system could materially and adversely affect us and we may be exposed to unidentified or unanticipated risks.
- Our loan and investment portfolios are subject to risk of prepayment, which could have a material adverse effect on us.
- We may generate lower revenues from fee and commission based businesses.
- Our financial statements are based in part on assumptions and estimates which, if inaccurate, could cause material misstatement of the results of our operations and financial position.
- Competition with other financial institutions could adversely affect us.
- We are exposed to risks faced by other financial institutions.
- The financial problems faced by our customers could adversely affect us.
- Liquidity and funding risks are inherent in our business and could have a material adverse effect on us.
- Credit, market and liquidity risk may have an adverse effect on our credit ratings and our cost of funds. Any downgrading in our credit rating would likely increase our cost of funding, require us to post additional collateral or take other actions under some of our derivative contracts and adversely affect our interest margins and results of operations.
- We are subject to market, operational and other related risks associated with our derivative transactions that could have a material adverse effect on us.
- Our ability to maintain our competitive position depends, in part, on the success of new products and services we offer our clients and our ability to continue offering products and services from third parties, and we may not be able to manage various risks we face as we expand our range of products and services that could have a material adverse effect on us.
- Any failure to effectively improve or upgrade our information technology infrastructure and management information systems in a timely manner could have a material adverse effect on us.
- We may not be able to detect money laundering and other illegal or improper activities fully or on a timely basis, which could expose us to additional liability and could have a material adverse effect on us.
- If we are unable to manage the growth of our operations, this could have an adverse impact on our profitability.
- We are exposed to risk of loss from legal and regulatory proceedings.
- We are subject to substantial regulation which could adversely affect our business and operations.
- Operational risks, including risks relating to data collection, processing and storage systems are inherent in our business.
- We rely on recruiting, retaining and developing appropriate senior management and skilled

	<p>personnel.</p> <ul style="list-style-type: none"> • Damage to our reputation could cause harm to our business prospects. • Changes in accounting standards could impact reported earnings. • We rely on third parties for important products and services. • We engage in transactions with our subsidiaries or affiliates that others may not consider to be on an arm's-length basis. • Our business could be affected if its capital is not managed effectively or if changes limiting our ability to manage our capital position are adopted. • Portions of our loan portfolio are subject to risks relating to force majeure events and any such event could materially adversely affect our operating results. • Our growth, asset quality and profitability in Latin America may be adversely affected by volatile macroeconomic and political conditions. • Changes in our pension liabilities and obligations could have a material adverse effect on us. • Changes in taxes and other assessments may adversely affect us. • Exposure to sovereign debt could have a material adverse effect on us. • We depend in part upon dividends and other funds from subsidiaries. • Our corporate disclosure may differ from disclosure regularly published by issuers of securities in other countries, including the United States.
D.3	Key risks regarding the Securities
	<p>There are also risks associated with the Instruments and with the markets. These risks may include, amongst others:</p> <ul style="list-style-type: none"> • Taxation in Spain: Under Spanish Law, payments of income in respect of the Instruments will not be subject to Spanish withholding tax provided that the relevant Issuer or the Guarantor receives certain information concerning the Instruments. If such information is not received by the Issuer or the Guarantor, as the case may, it will be required to apply Spanish withholding tax to any payment of interest in respect of the Instruments, [<i>or income arising from the payment of Instruments issued below par</i>]; • In certain circumstances a portion of payments made on or with respect to the Instruments may be subject to US reporting obligations which, if not satisfied, may require US tax to be withheld; • Withholding under the EU Savings Directive; • The temporary Commissioner (which owes certain obligations to the Syndicate of Holders (as described in the Issue and Paying Agency Agreement) will be appointed by the Issuer and may also be an employee or officer of such Issuer or of the Guarantor; • The Spanish Insolvency Law, provides, among other things, that: (i) any claim may become subordinated if it is not reported to the insolvency administrators (<i>administradores concursales</i>) within a certain period, (ii) provisions in a contract granting one party the right to terminate by reason only of the other's insolvency may not be enforceable, and (iii) interest (other than interest accruing under secured liabilities up to an amount equal to the value of the asset subject to the security) shall cease to accrue as from the date of the declaration of insolvency and any amount of interest accrued up to such date (other than any interest accruing under secured liabilities up to an amount equal to the value of the asset subject to the security) shall become subordinated. In addition, recent amendments to the Insolvency Law have been implemented which, in certain instances, have the effect of modifying or impairing creditors' rights; • Prospective investors should make their own evaluations to determine whether an investment in the Instruments is appropriate in their particular circumstances and should

- consult with their legal, business and tax advisers accordingly;
- The Instruments are new securities which may not be widely distributed and for which there is currently no active trading market;
- Because the Global Instruments are held by or on behalf of Euroclear and Clearstream, Luxembourg, investors will have to rely on their procedures for transfer, payment and communication with the Issuer and/or the Guarantor;
- One or more independent credit rating agencies have assigned certain credit ratings to the Instruments. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Instruments. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

Additionally, the risks relating to investment in the Instruments depend on their features and may include, *inter alia*, risks relating to (but not limited to) operational/business risk, credit risk, liquidity risk, interest rate risk, regulatory risk, reputational risk, competition risk, unsecured obligations, market risk, hedging and potential conflicts of interest, tax liabilities, expenses and taxation, third party risk, structural risks relating to particular Instruments, including with respect to certain underlying, no claim against the reference item(s) to which the Instruments relate, exchange rate risks, settlement disruption, illegality and cancellation, time lag after redemption or exercise, settlement risk, possible illiquidity of Instruments, equity risk, underlying volatility risk, fund risk, failure to deliver due to illiquidity, inflation risk, modification, meetings, market disruption, optional redemption, a requirement to hold a minimum amount of Instruments, transfer restrictions and exchange, listing and legal regulation risk.
