D.3 Key risks regarding the Securities

There are also risks associated with the Instruments and with the markets. These risks may include, amongst others:

Taxation in Spain: Under Spanish Law, payments of income in respect of the listed Instruments will not be subject to Spanish withholding tax provided that the relevant Issuer or the Guarantor receives certain information concerning the Instruments. If such information is not received by the relevant Issuer or the Guarantor, as the case may, it will be required to apply Spanish withholding tax to any payment of interest in respect of the relevant Instruments, or income arising from the payment of Instruments issued below par;

The US Hiring Incentives to Restore Employment Act withholding may affect payments on the Instruments;

U.S. Foreign Account Tax Compliance Act Withholding;

Withholding under the EU Savings Directive;

The implementation of the EU Crisis Management Directive could materially affect the value of any Instruments.

The Commissioner (which owes certain obligations to the Syndicate of Holders (as described in the Issue and Paying Agency Agreement) will be appointed by the relevant Issuer and may also be an employee or officer of such Issuer or of the Guarantor;

The Spanish Insolvency Law, provides, among other things, that: (i) any claim may become subordinated if it is not reported to the insolvency administrators (*administradores concursales*) within a certain period, (ii) provisions in a contract granting one party the right to terminate by reason only of the other's insolvency may not be enforceable, and

(iii) interest (other than interest accruing under secured liabilities up to an amount equal to the value of the asset subject to the security) shall cease to accrue as from the date of the declaration of insolvency and any amount of interest accrued up to such date (other than any interest accruing under secured liabilities up to an amount equal to the value of the asset subject to the security) shall become subordinated. In addition, recent amendments to the Insolvency Law have been implemented which, in certain instances, have the effect of modifying or impairing creditors' rights;

Prospective investors should make their own evaluations to determine whether an investment in the Instruments is appropriate in their particular circumstances and should consult with their legal, business and tax advisers accordingly;

Instruments issued under the Programme will be new securities which may not be widely distributed and for which there is currently no active trading market;

Instruments may be redeemable at the relevant Issuer's option in certain circumstances. If such option is exercised, an investor may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as that of the relevant Instruments.

Because the Global Instruments are held by or on behalf of Euroclear and Clearstream, Luxembourg, investors will have to rely on their procedures for transfer, payment and communication with the relevant Issuer and/or the Guarantor;

Instruments subject to optional redemption by the Issuer, which is likely to limit their market value.

In accordance with applicable regulations, the Subordinated Instruments may not be early redeemed due to the non-payment of the Subordinated Instruments, or of other debts of the Issuer or of any members of its group.

The Group may issue Instruments with interest determined by reference to an inflation or equity index (each, a Relevant Index). Potential investors should be aware that the market price of such Instruments may be volatile and that they may receive no interest. In addition, potential investors should be aware that: (i) a Relevant Index may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices; (ii) if a Relevant Index is applied to Instruments in conjunction with a multiplier greater than one (or contains some other leverage factor) the effect of changes in the Relevant Index on interest payable likely will be magnified; and (iii) the timing of changes in a Relevant Index may affect the actual yield to investors.

The Issuer may issue Instruments where the issue price is payable in more than one instalment. Failure to pay any subsequent instalment could result in an investor losing all of its interest payments.

The Issuer may issue Inverse Floating Rate Instruments which have an interest rate equal to a fixed rate minus a rate based upon a reference rate such as LIBOR. The market values of those Instruments typically are more volatile than market values of other conventional floating rate debt securities based on the same reference rate (and with otherwise comparable terms).

The Issuer may issue Fixed/Floating Rate Instruments. Such Instruments may bear interest at a rate that may convert from a fixed rate to a floating rate, or from a floating rate to a fixed rate. Where the relevant Issuer has the right to effect such a conversion, this will affect the secondary market and the market value of the Instruments since the Issuer may be expected to convert the rate when it is likely to produce a lower overall cost of borrowing.

The Issuer may issue Instruments at a substantial discount or premium from their principal amount. The market values of such Instruments tend to fluctuate more in relation to general changes in interest rates than do prices for conventional interest-bearing securities.

The investment in Equity Index-Linked Interest Instruments and Inflation Linked Interest Instruments entails certain risks and it is only suitable for certain potential kind of investors.

The terms of Equity Index-Linked Interest Instruments and Inflation Linked Interest Instruments differ from those of ordinary debt securities and may not pay interest on maturity, depending on the performance of the relevant underlying Index or Share Index.

The value of Equity Index-Linked Interest Instruments and Inflation Linked Interest Instruments may be influenced by unpredictable factors beyond the Issuer's and the Guarantor's control.

There are certain considerations regarding the use of Equity Index-Linked Interest Instruments or Inflation Linked Interest Instruments as hedging instruments involving correlation risks.

The effect of the liquidity of the relevant underlying Index or Share Index on Equity Index- Linked Interest Instruments and Inflation Linked Interest Instruments pricing.

Exchange rates and exchange controls may affect the value or return of the Equity Index-Linked Interest Instruments or Inflation Linked Interest Instruments.

Investors have no shareholder rights.

Potential conflicts of interest between the investor and the Calculation Agent.

The Calculation Agent may determine that a Market Disruption Event or a failure to open of an Exchange or Related Exchange has occurred or exists on a relevant date of valuation, and any consequential postponement of such date of valuation may have an adverse effect on the value of the Instruments.

When determining the value and/or performance of the relevant underlying Indices or Share Indices in respect of a Series of Equity Index-Linked Interest Instruments or Inflation Linked Interest Instruments may provide for a cap or be subjected to a floor, such that any value and/or performance of the relevant underlying Index or Share Index (or individual basket components) in excess or below the applicable cap or floor, respectively, will not be taken into account for the purposes of the relevant determination.

Santander Issuances' obligations under Subordinated Instruments will be unsecured and subordinated and will rank junior in priority of payment to all unsubordinated obligations of Santander Issuances. The Guarantor's obligations under the Subordinated Guarantee will be unsecured and subordinated and will rank junior in priority of payment to all unsubordinated obligations of the Guarantor.

One or more independent credit rating agencies may assign credit ratings to the Instruments. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Instruments. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

Additionally, the risks relating to investment in the Instruments depend on their features and may include, *inter alia*, risks relating to (but not limited to) operational/business risk, credit risk, liquidity risk, interest rate risk, regulatory risk, reputational risk, competition risk, unsecured obligations, market risk, hedging and potential conflicts of interest, tax liabilities, expenses and taxation, third party risk, structural risks relating to particular Instruments, including with respect to certain underlying, no claim against the reference item(s) to which the Instruments relate, exchange rate risks, settlement disruption, illegality and cancellation, time lag after redemption or exercise, settlement risk, possible illiquidity of Instruments, equity risk, underlying volatility risk, fund risk, failure to deliver due to illiquidity, inflation risk, modification, meetings, market disruption, optional redemption, a requirement to hold a minimum amount of Instruments, transfer restrictions and exchange, listing and legal regulation risk.
