Section D – Risks

Element	Title	
D.2	Key risks regarding the Issuer and the Guarantor:	In purchasing Notes, investors assume the risk that the Issuer and the Guarantor may become insolvent or otherwise be unable to make all payments due in respect of the Notes. There is a wide range of factors which individually or together could result in the Issuer and the Guarantor becoming unable to make all payments due in respect of the Notes. It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuer and the Guarantor may not be aware of all relevant factors and certain factors which they currently deem not to be material may become material as a result of the occurrence of events outside the Issuer's and the Guarantor's control. The Issuer and the Guarantor have identified a number of factors which could materially adversely affect their businesses and ability to make payments due under the Notes. These factors include:

Risk Factors relating to the Issuer

- Any decline in the Kingdom of Spain's sovereign credit ratings could adversely affect the Group's business, financial condition and results of operations.
- The Group may be materially adversely affected by developments in the emerging markets where it operates.
- The Group's earnings and financial condition have been, and its future earnings and financial condition may continue to be, materially affected by depressed asset valuations resulting from poor market conditions.

- Local regulation may have a material effect on the Guarantor's business, financial condition, results of operations and cash flows.

Liquidity and Financial Risks

- The Guarantor has a continuous demand for liquidity to fund its business activities. The Guarantor may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong.
- Withdrawals of deposits or other sources of liquidity may make it more difficult or costly for the Group to fund its business on favourable terms or cause the Group to take other actions.
- Implementation of internationally accepted liquidity ratios might require changes in business practices that affect the profitability of the Guarantor's business activities.
- The Group's businesses are subject to inherent risks concerning borrower and counterparty credit quality which have affected and are expected to continue to affect the recoverability and value of assets on the Group's balance sheet
- The Group's business is particularly vulnerable to volatility in interest rates.
- The Guarantor is dependent on its credit ratings and any reduction of its credit ratings could materially and adversely affect the Group's business, financial condition and results of operations.

- The procedure for provision of information described in the Base Prospectus is a summary only.
- The conditions of the Notes contain provisions which may permit their modification without the consent of all investors.

- The Issuer of the Notes may be substituted without the consent of the Noteholders.
- The Guarantor of the Notes may be substituted without the consent of the Noteholders.
- The Notes may be subject to withholding taxes in circumstances where the Issuer is not obliged to make gross up payments and this would result in holders receiving less interest than expected and could significantly adversely affect their return on the Notes.

postponement of any Strike Date, Valuation Date, Observation Date or Averaging Date may have an adverse effect on the Notes.
