Information Concerning Investment Risk

Noteholders and prospective purchasers of Notes should ensure that they understand the nature of the Notes and the extent of their exposure to risk and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition.

In purchasing any Notes, purchasers will be deemed to represent and undertake to the Issuer, Dealer and each of their affiliates that (i) such purchaser understands the risks and potential consequences associated with the purchase of the Notes and (ii) that such purchaser has consulted with its own legal, regulatory, investment, accounting, tax and other advisers to extent it believes is appropriate to assist it in understanding and evaluating the risks involved in, and the consequences of, purchasing the Notes.

Potential investors are urged to consult with their legal, regulatory, investment, accounting, tax and other advisors with regard to any proposed or actual investment in the Notes and to review the Offering Circular. Please see the Offering Circular together with this Pricing Supplement for a full detailed description of the Notes and in particular, please review the Risk Factors associated with these Notes. Investing in the Notes entails certain risks including, but not limited to, the following:

Adjustments by the Determination Agent: The terms and conditions of the Notes will allow the Determination Agent to make adjustments or take any other appropriate action if circumstances occur where the Notes or any exchanges are affected by market disruption, adjustment events or circumstances affecting normal activities.

Credit Risk: Investors are exposed to the credit risk of the Issuer. The Notes are essentially a loan to the Issuer with a repayment amount that the Issuer promises to pay to you at maturity. There is the risk, however, that the Issuer may not be able to fulfil its promise to you. If any companies in the Morgan Stanley group incur losses with respect to any of their activities, this may have a negative impact on the financial condition of the Issuer. You may lose all or part of your investment if the Issuer is unable to pay the redemption amount and/or goes into liquidation. No assets of the Issuer are segregated and specifically set aside in order to pay the holders of the Notes in the event of liquidation of the Issuer, and the holders of the Notes will rank behind creditors who have priority rights over certain assets of the Issuer.

Market Risk: The Notes are denominated, and all payments will be made, in United States Dollar. There are risks inherent in investments in notes denominated and payable in United States Dollar for investors whose home and/or functional currency is not United States Dollar. You should consult your financial, legal and tax advisers as to any specific risks entailed by an investment in notes that are denominated and payable in a currency other than the currency of the country in which you are resident or in which you conduct your business. We refer to such country as your “home country” and to the currency of your home country as your “home currency”.

Exit Risk: The secondary market price of the Notes will depend on many factors, including interest rates, interest rate volatility, time remaining to maturity and the creditworthiness of the Issuer. Depending on the actual or anticipated level of any of the above, the market value of the notes may decrease and you may receive substantially less than 100% of the issue price if you sell your notes prior to maturity.

Early Redemption for Taxation Reasons: The terms and conditions of the Notes allow the Issuer to redeem the Notes early if the Issuer is required to deduct or withhold any taxes in respect of its payments on the Notes. In such circumstances, Noteholders may receive less than the principal amount of the Notes upon such early redemption.

Liquidity Risk: Any secondary market in the Notes made by the Dealer will be made on a reasonable efforts basis only and subject to market conditions, law, regulation and internal policy. Even whilst there may be a secondary market in the Notes it may not be liquid enough to facilitate a sale by the holder.

Potential Conflict of Interest: The Determination Agent (MSI plc) is an affiliate of the Issuer and the economic interests of the Determination Agent may be adverse to the interests of holders of the Notes. Determinations made by the Determination Agent may affect the amount payable to holders pursuant to the terms of the Notes.

Tax Considerations: Special tax considerations may apply to certain types of taxpayers. Prospective investors are urged to consult with their own tax advisors to determine any tax implications of this investment.

Accounting Considerations: Special accounting considerations may apply to certain types of investors. Prospective investors are urged to consult with their own accounting advisors to determine implications of this investment.

Reform of LIBOR and EURIBOR and Other Interest Rate Index and Equity, Commodity and Foreign Exchange Rate Index “Benchmarks”: The London Interbank Offered Rate (“LIBOR”), the Euro Interbank Offered Rate (“EURIBOR”) and other indices which are deemed “benchmarks” are the subject of recent national, international and other regulatory guidance and proposals for reform. Some of these reforms are already effective while others are still to be implemented. These reforms may cause such “benchmarks” to perform differently than in the past, or to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Program Securities linked to a “benchmark.”

Any of the international, national or other proposals for reform or the general increased regulatory scrutiny of “benchmarks” could increase the costs and risks of administering or otherwise participating in the setting of a “benchmark” and complying with any such regulations or requirements. Such factors

may have the effect of discouraging market participants from continuing to administer or participate in certain “benchmarks,” trigger changes in the rules or methodologies used in certain “benchmarks” or lead to the disappearance of certain “benchmarks”. The disappearance of a “benchmark” or changes in the manner of administration of a “benchmark” could have materially adverse consequences in relation to securities linked to such “benchmark”.

Potential Replacement of LIBOR May Adversely Affect the Return on Any Securities Linked to LIBOR and their Secondary Market Prices. Central banks around the world, including the U.S. Federal Reserve, have commissioned working groups that include market participants (the “Alternative Rate Committees”) with the goal of finding suitable replacements for their currency’s LIBOR that are based on observable market transactions. The search for replacements accelerated after the Financial Stability Board reported that uncertainty surrounding the integrity of LIBOR represents a potentially serious systemic vulnerability and risk due to limited transactions in the underlying inter-bank lending market. In July 2017, the Chief Executive of the United Kingdom Financial Conduct Authority (the “FCA”), which regulates LIBOR, called for an orderly transition over a 4-5 year period from LIBOR to the reference rates selected by the Alternative Rate Committees. The FCA’s announcement stated that it expects that it would not be in a position to sustain LIBOR through its influence or legal compulsion powers after the end of 2021. Any transition away from LIBOR, as well as the uncertainty surrounding the future of LIBOR and future regulatory and market developments, could have a materially adverse effect on the return on any securities linked to LIBOR and their secondary market prices.

LIBOR, EURIBOR and other benchmark rate discontinuance or prohibition on use may lead to adjustments to the terms of the Notes or an early redemption of the Notes

Where any variable by reference to which interest is payable under the Notes is an index, benchmark, rate or price source which is specified in the Conditions as a “Relevant Rates Benchmark”, the administrator or sponsor (or the Relevant Rates Benchmark) may be required to be authorised, registered, recognised, endorsed or otherwise included in an official register in order for the Issuer, the Determination Agent or the Calculation Agent to be permitted to use the Relevant Rates Benchmark and perform their respective obligations under the Notes. If the Determination Agent determines that such a requirement applies to the administrator or sponsor (or the Relevant Rates Benchmark) but it has not been satisfied then, an “Administrator/Benchmark Event” will occur.

In order to address the risk of an Administrator/Benchmark Event occurring or a possible discontinuance of LIBOR (referred to above) and other reference rates, the Conditions include certain fallback provisions. These provisions apply to “Relevant Rates Benchmarks” (which will include LIBOR, EURIBOR and other similar interbank rates). The fallback provisions will be triggered if the Determination Agent determines that (i) the administrator or regulatory supervisor (or other applicable regulatory body) in connection with such Relevant Rates Benchmark announces that the administrator has ceased or will cease permanently or indefinitely to provide such Relevant Rates Benchmark and there is no successor administrator that will continue to provide the Relevant Rates Benchmark, or (ii) unless otherwise specified in the applicable Pricing Supplement, an Administrator/Benchmark Event occurs in relation to such Relevant Rates Benchmark.

Following the occurrence of any of these events the Determination Agent may replace the Relevant Rates Benchmark with any “Alternative Pre-nominated Reference Rate” which has been specified in the applicable Pricing Supplement or if no Alternative Pre-nominated Reference Rate is specified in the applicable Pricing Supplement, with an alternative rate that is consistent with accepted market practice for debt obligations such as the Notes. If an Alternative Pre-nominated Reference Rate or other alternative rate is used then the Determination Agent may also make other adjustments to the Notes, including to the new rate and to the Margin, which are consistent with accepted market practice. If the Determination Agent is unable to identify an alternative rate and determine the necessary adjustments to the terms of the Notes then the Issuer may redeem the Notes.

The application of any of these fallbacks may adversely affect the value of the Noteholder’s investment in the Notes.

Prospective investors should review the Conditions to ascertain whether and how such provisions apply to the Notes and what constitutes an Administrator/Benchmark Event.
