No additional amounts will be payable in respect of such withholding taxes.

Prospective investors are urged to read the section headed “*Risk Factors*” in the Offering Circular as supplemented by the Supplement/Supplemental Offering Circular/Pricing Supplement for a discussion of certain matters that should be considered when making a decision to invest in the Securities.

The following is a summary only of the Issuer's understanding of current law and practice in Switzerland relating to the taxation of the Securities.

It does not address the tax consequences of an investment in the Securities in any other jurisdiction than Switzerland. Because this summary does not address all tax considerations under Swiss law and does not consider the specific tax situation of an investor, prospective investors are recommended to consult their personal tax advisors as to the tax consequences of the purchase, ownership, sale or redemption of the Securities including, in particular, the effect of tax laws of any other jurisdiction. Tax laws and the practice can change, possibly with retroactive effect.

Swiss Withholding Tax ("Verrechnungssteuer")

The Securities are not subject to Swiss Withholding Tax.

Swiss Securities Transfer Tax ("Umsatzabgabe")

Secondary market transactions are not subject to Swiss Securities Transfer Tax. Furthermore, if the underlying asset is delivered at maturity and a Swiss Securities Dealer is involved in the transaction and no exemption applies, the transfer is also subject to Swiss Securities Transfer Tax.

Swiss Income Tax ("Einkommenssteuer")

For private investors with domicile in Switzerland holding the Securities as private assets, the interest component* of the periodic payments is subject to Swiss Federal Direct Tax ("Direkte Bundessteuer"). The cantonal and communal income tax treatment can differ from the tax treatment for the Federal Direct Tax. However, in general the tax treatments correspond.

* each to be converted into Swiss Francs at the prevailing exchange rate on the relevant interest payment date or at redemption (if applicable).

The agreement applies to all 28 EU member states and Gibraltar and certain other jurisdictions. Also, Switzerland has entered into the multilateral competent authority agreement on the automatic exchange of financial account information ("MCAA"), and based on the MCAA, a number of bilateral AEOI agreements with other countries. Based on such agreements and the implementing laws of Switzerland, Switzerland commenced collecting, or will commence collecting, data

in respect of financial assets held in, and income derived thereon and credited to, accounts or deposits with a paying agent in Switzerland, including, as the case may be, this Security, for the benefit of individuals resident in a EU member state or other treaty state from 2017 or a later date, and began exchanging, or will begin exchanging, the data from 2018 or a later date, in each case depending on the date of effectiveness of the relevant agreement. Switzerland has signed and intends to sign further AEOI agreements with further countries. An up-to-date list of the AEOI agreements of Switzerland in effect or signed and becoming effective, including the dates of commencement of data collection and data exchange, can be found on the website of the State Secretariat for International Financial Matters SIF, www.sif.admin.ch.

The investors bear the credit risk of Barclays Bank PLC as Issuer of the Securities. The Securities constitute unsubordinated, unsecured contractual obligations of Barclays Bank PLC and rank pari passu in all respect with all other unsubordinated, unsecured contractual obligations of Barclays Bank PLC. The insolvency of Barclays Bank PLC may lead to a partial or total loss of the invested capital.

This Security does not represent a participation in any of the collective investment schemes pursuant to the Federal Act on Swiss Collective Investment Schemes (CISA) and thus does not require an authorization of the Swiss Financial Market Supervisory Authority (FINMA). Therefore, investors in this Security are not eligible for the specific investor protection under the CISA.

Fluctuations in exchange rates, interest rates and/or rates of inflation, a change in the Issuer's rating as well as other factors could cause the value of investments made by Securityholders to increase or decrease.

Index Linked Securities

Index Linked Securities are debt securities which do not provide for predetermined redemption amounts and/or interest payments but amounts due in respect of principal and/or interest will be dependent upon the performance of the Index, which itself may contain substantial credit, interest rate or other risks. The redemption amount and/or interest, if any, payable by the Issuer might be substantially less than the Issue Price or, as the case may be, the purchase price invested by the Securityholder and may even be zero in which case the Securityholder may lose his entire investment.

Equity Linked Securities

Equity Linked Securities are debt securities which do not provide for predetermined redemption amounts and/or interest payments. Redemption amounts and/or interest payments will depend on the market value of the underlyings which might be substantially less than the Issue Price or, as the case may be, the purchase price invested by the Securityholder and may even be zero in which case the Securityholder may lose his entire investment. If the underlyings are to be delivered instead of cash redemption, the value of such Securities may also be substantially less than the Issue Price or, as the case may be, the purchase price invested by the Securityholder.

Commodity Linked Securities

Commodity Linked Securities are debt securities which do not provide for predetermined amounts and/or interest payments. Commodity Linked Securities may relate to one or more Relevant Commodity(ies) and may bear interest at commodity linked interest amounts and/or will be redeemed at a Commodity Linked Redemption Amount, both of which will be calculated by reference to such Relevant Commodity or the Relevant Commodities, as the case may be. Fluctuations in the value of the Relevant Commodity will affect the value of the Commodity Linked Security. The amount of principal and/or interest, if any, payable by the Issuer might be substantially less than the Issue Price or, as the case may be, the purchase price invested by the Securityholder and may even be zero in which case the Securityholder may lose his entire investment. In the case of resources and precious metals as underlyings, Investors should be aware of the fact, that such underlyings may globally nearly be traded non-stop in various time zones. This may lead to a determination of different values of the relevant underlying in different places. The relevant Terms and Conditions and/or the relevant Pricing Supplement will determine, which exchange or which trading platform and which timing is used to determine the value of the relevant underlying and to determine whether the relevant underlying went below or above certain barriers, if any.

Currency Linked Securities

Currency Linked Securities refer to a specific currency or dual currency and do not provide for a predetermined redemption or interest amount. Such payments depend on the performance of the underlying currency(ies) and may be substantially less than the Issue Price or, as the case may be, the purchase price invested by the Securityholder.

Fund Linked Securities

Fund Linked Securities are debt securities which do not provide for predetermined redemption amounts and/or interest payments. Redemption amounts and/or interest payments will depend on the market value of the underlying fund(s) which might be substantially less than the Issue Price or, as the case may be, the purchase price invested by the Securityholder and may even be zero in which case the Securityholder may lose his entire investment.

Interest Rate Risk

The interest rate risk is one of the central risks of interest-bearing Securities. The interest rate level on the money and capital markets may fluctuate on a daily basis and cause the value of the Securities to change on a daily basis. The interest rate risk is a result of the uncertainty with respect to future changes of the market interest rate level. In particular, Securityholders of Fixed Rate Securities are exposed to an interest rate risk that could result in a diminution in value if the market interest rate level increases. In general, the effects of this risk increase as the market interest rates increase.

Credit Risk

Any person who purchases the Securities is relying upon the creditworthiness of the Issuer and has no rights against any other person. Securityholders are subject to the risk of a partial or total failure of the Issuer to make interest and/or redemption payments that the Issuer is obliged to make under the Securities. The worse the creditworthiness of the Issuer, the higher the risk of loss.

Credit Spread Risk

Factors influencing the credit spread include, among other things, the creditworthiness and rating of the Issuer, probability of default, recovery rate, remaining term to maturity of the Security and obligations under any collateralisation or guarantee and declarations as to any preferred payment or subordination. The liquidity situation, the general level of interest rates, overall economic developments, and the currency, in which the relevant obligation is denominated may also have a positive or negative effect. Securityholders are exposed to the risk that the credit spread of the Issuer widens which results in a decrease in the price of the Securities.

Rating of the Securities

A rating of Securities, if any, may not adequately reflect all risks of the investment in such Securities. Equally, ratings may be suspended, downgraded or withdrawn. Such suspension, downgrading or withdrawal may have an adverse effect on the market value and trading price of the Securities. A credit rating is not a recommendation to buy, sell or hold Securities and may be revised or withdrawn by the rating agency at any time.

Reinvestment Risk

Securityholders may be exposed to risks connected to the reinvestment of cash resources freed from any Security. The return the Securityholder will receive from a Security depends not only on the price and the nominal interest rate of the Security but also on whether or not the interest received during the term of the Security can be reinvested at the same or a higher interest rate than the rate provided for in the Security. The risk that the general market interest rate falls below the interest rate of the Security during its term is generally called reinvestment risk. The extent of the reinvestment risk depends on the individual features of the relevant Security.

Inflation Risk

The inflation risk is the risk of future money depreciation. The real yield from an investment is reduced by inflation. The higher the rate of inflation, the lower the real yield on a Security. If the inflation rate is equal to or higher than the nominal yield, the real yield is zero or even negative.
