Section D – Risks

Element	Title
D.2	<p>Key risks regarding the Issuer and the Guarantor:</p> <p>In purchasing Notes, investors assume the risk that the Issuer and the Guarantor may become insolvent or otherwise be unable to make all payments due in respect of the Notes. There is a wide range of factors which individually or together could result in the Issuer and the Guarantor becoming unable to make all payments due in respect of the Notes. It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuer and the Guarantor may not be aware of all relevant factors and certain factors which they currently deem not to be material may become material as a result of the occurrence of events outside the Issuer's and the Guarantor's control. The Issuer and the Guarantor have identified a number of factors which could materially adversely affect their businesses and ability to make payments due under the Notes. These factors include:</p> <p>Risk Factors relating to the Issuer</p> <ul style="list-style-type: none"> • Issuer's dependence on the Guarantor to make payments on the Notes. • Certain considerations in relation to the forum upon insolvency of the Issuer. <p>Factors that may affect the Guarantor's ability to fulfil its obligations under the Guarantee</p> <p>Macroeconomic Risks</p> <ul style="list-style-type: none"> • Economic conditions in the countries where the Group operates could have a material adverse effect on the Group's business, financial condition and results of operations. • Since the Guarantor's loan portfolio is highly concentrated in Spain, adverse changes affecting the Spanish economy could have a material adverse effect on its financial condition. • Any decline in the Kingdom of Spain's sovereign credit ratings could adversely affect the Group's business, financial condition and results of operations.

- The Group may be materially adversely affected by developments in the emerging markets where it operates.
- The Group's earnings and financial condition have been, and its future earnings and financial condition may continue to be, materially affected by depressed asset valuations resulting from poor market conditions.
- Exposure to the real estate market makes the Group vulnerable to developments in this market.

Legal, Regulatory and Compliance Risks

- The Group is subject to substantial regulation and regulatory and governmental oversight. Changes in the regulatory framework could have a material adverse effect on its business, results of operations and financial condition.
- Increasingly onerous capital requirements may have a material adverse effect on the Guarantor's business, financial condition and results of operations.
- Minimum requirement for own funds and eligible liabilities (MREL). Any failure by BBVA and/or the Group to comply with its MREL could have a material adverse effect on the Guarantor's business, financial condition and results of operations.
- Increased taxation and other burdens imposed on the financial sector may have a material adverse effect on the Guarantor's business, financial condition and results of operations.
- Contributions for assisting in the future recovery and resolution of the Spanish banking sector may have a material adverse effect on the Guarantor's business, financial condition and results of operations.
- Regulatory developments related to the EU fiscal and banking union may have a material adverse effect on the Guarantor's business, financial condition and results of operations.
- The Group's anti-money laundering and anti-terrorism policies may be circumvented or otherwise not be sufficient to prevent all money laundering or terrorism financing.
- The Group is exposed to risk in relation to compliance with anti-corruption laws and regulations and sanctions programmes.
- Local regulation may have a material effect on the Guarantor's business, financial condition, results of operations and cash flows.

Liquidity and Financial Risks

- The Guarantor has a continuous demand for liquidity to fund its business activities. The Guarantor may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong.

- Withdrawals of deposits or other sources of liquidity may make it more difficult or costly for the Group to fund its business on favourable terms or cause the Group to take other actions.
- Implementation of internationally accepted liquidity ratios might require changes in business practices that affect the profitability of the Guarantor's business activities.
- The Group's businesses are subject to inherent risks concerning borrower and counterparty credit quality which have affected and are expected to continue to affect the recoverability and value of assets on the Group's balance sheet
- The Group's business is particularly vulnerable to volatility in interest rates.
- The Guarantor is dependent on its credit ratings and any reduction of its credit ratings could materially and adversely affect the Group's business, financial condition and results of operations.
- Highly-indebted households and corporations could endanger the Group's asset quality and future revenues.
- The Group depends in part upon dividends and other funds from subsidiaries.

Business and Industry Risks

- The Group faces increasing competition in its business lines.
- The Group faces risks related to its acquisitions and divestitures.

- The Group's ability to maintain its competitive position depends significantly on its international operations, which expose the Group to foreign exchange, political and other risks in the countries in which it operates, which could cause an adverse effect on its business, financial condition and results of operations.

Financial and Risk Reporting

- Weaknesses or failures in the Group's internal processes, systems and security could materially adversely affect its results of operations, financial condition or prospects, and could result in reputational damage.
- The financial industry is increasingly dependent on information technology systems, which may fail, may not be adequate for the tasks at hand or may no longer be available.
- The Guarantor's financial statements are based in part on assumptions and estimates which, if inaccurate, could cause material misstatement of the results of its operations and financial position.

<p>D.3</p>	<p>Key risks regarding the Notes:</p>	<p>There are a number of risks associated with an investment in the Notes. These risks include:</p> <ul style="list-style-type: none"> • Notes may be redeemed prior to their scheduled maturity. • Claims of Holders under the Notes are effectively junior to those of certain other creditors. • Spanish Tax Rules may impose withholding tax in certain circumstances (subject to certain exceptions) and neither the Issuer nor the Guarantor is obliged to pay additional amounts in such event. • The procedure for provision of information described in the Base Prospectus is a summary only. • The conditions of the Notes contain provisions which may permit their modification without the consent of all investors. • If the Issuer has the right to redeem any Notes at its option, this may limit the market value of the Notes concerned and an investor may not be able to reinvest the redemption proceeds in a manner which achieves a similar effective return. • The Issuer of the Notes may be substituted without the consent of the Noteholders. • The Guarantor of the Notes may be substituted without the consent of the Noteholders. • The Notes may be subject to withholding taxes in circumstances where the Issuer is not obliged to make gross up payments and this would result in holders receiving less interest than expected and could significantly adversely affect their return on the Notes. • The value of the Notes could be adversely affected by a change in English law or administrative practice. • Reliance on DTC, Euroclear and Clearstream, Luxembourg procedures. • Credit ratings assigned to the Issuer, the Guarantor or any Notes may not reflect all the risks associated with an investment in those Notes.

- If a Reference Item Linked Note includes Market Disruption Events or Failure to Open of an Exchange and the Calculation Agent determines such an event has occurred, any consequential postponement of any Strike Date, Valuation Date, Observation Date or Averaging Date may have an adverse effect on the Notes.
- If an investor holds Notes which are not denominated in the investor's home currency, that investor will be exposed to movements in exchange rates adversely affecting the value of its holding. In addition, the imposition of exchange controls in relation to any Notes could result in an investor not receiving payments on those Notes

		<ul style="list-style-type: none"> • There may be price discrepancies with respect to the Notes as between various dealers or other purchasers in the secondary market. <p>Potential Conflicts of Interest</p> <ul style="list-style-type: none"> • The Issuer, the Guarantor and their respective affiliates may take positions in or deal with Reference Item(s). • The Calculation Agent, which will generally be the Guarantor or an affiliate of the Guarantor, has broad discretionary powers which may not take into account the interests of the Noteholders. • The Issuer and/or the Guarantor may have confidential information relating to the Reference Item and the Notes. • The Guarantor's securities may be/form part of a Reference Item. • Potential conflicts of interest relating to distributors or other entities involved in the offer or listing of the Notes. <p>Calculation Agent powers should be considered</p>
