Information Concerning Investment Risk

Noteholders and prospective purchasers of Notes should ensure that they understand the nature of the Notes and the extent of their exposure to risk and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition. Given the highly specialised nature of these Notes, the Issuer and the Dealer consider that they are only suitable for highly sophisticated investors who are able to determine for themselves the risk of an investment in the Notes and who are willing to take such risks. Consequently, if you are not an investor who falls within the description above you should not consider purchasing these Notes without taking detailed advice from a specialised professional adviser.

Please review the Offering Circular together with this Pricing Supplement for a full detailed description of the Notes and in particular, please review the Risk Factors in the Offering Circular. Investing in the Notes entails certain risks including, but not limited to, the following:

Structure Specific Risks

Capital protection at maturity: Capital protection is provided at maturity only. If the Notes are sold prior to maturity, or redeemed by the Issuer for reasons stated in the Offering Circular and this document, the proceeds may be less than the initial investment.

Underlyings Specific Risks

The historical performance of the Underlying is not an indication of future performance. Historical performance of 3 month Euribor (as defined herein) (the “Underlying”) should not be taken as an indication of their future performance during the term of the Notes. Changes in the levels of the Underlying will affect the trading price of the Notes, but it is impossible to predict whether such levels will rise or fall.

The Underlying will be affected by a number of factors. A number of factors can affect the Underlying, including but not limited to: (i) changes in, or perceptions, about the future Underlying; (ii) general economic conditions: the economic, financial, political, regulatory and judicial events that affect financial markets generally will affect the Underlyings; (iii) prevailing interest rates: the Underlying are subject to daily fluctuations depending on prevailing interest rates in the market generally; and (iv) policies of the governing bodies regarding interest rates. These and other factors may have a negative impact on the value of the Notes prior to maturity.

The Underlying may be volatile. The Underlying are subject to volatility due to a variety of factors affecting interest rates generally, including but not limited to: (i) sentiment regarding the EU and global economies; (ii) expectations regarding the level of price inflation; (iii) sentiment regarding credit quality in the EU and global credit markets; (iv) central bank policy regarding interest rates; and (v) performance of capital markets. The Underlying may be volatile, and even a very small absolute change in the Underlying over the term of the Notes can result in a significant loss on the Notes. Accordingly, volatility of the Underlying may adversely affect your return on the securities.

Adjustment in the event of a permanent discontinuance of a floating rate option. If 3 month Euribor has been permanently discontinued, the Determination Agent will use, as a substitute for such rate in respect of any date on which such rate is to be determined hereunder, the alternative reference rate selected by the central bank, reserve bank, monetary authority or any similar institution (including any committee or working group thereof) in the jurisdiction of the applicable index currency that is consistent with accepted market practice (the “Alternative Rate”). As part of such substitution, the Determination Agent will, after consultation with the Issuer, make such adjustments to the Alternative Rate or the spread thereon, as well as the business day convention, determination dates and related provisions and definitions, in each case that are consistent with accepted market practice for the use of such Alternative Rate for debt obligations such as the Notes. If, however, the Determination Agent determines in good faith that no Alternative Rate exists on the relevant date, it shall make its own determination of an alternative rate as a substitute for the relevant rate, acting in good faith and in a commercially reasonable manner.

Liquidity / Exit Risk

Liquidity Risk: Any secondary market in the Notes made by the Dealer will be made on a reasonable efforts basis only and subject to market conditions, law, regulation and internal policy. Even whilst there may be a secondary market in the Notes it may not be liquid enough to facilitate a sale by the holders.

Exit Risk: Any secondary market price of the Notes will depend on many factors, including the value and volatility of the Underlying, interest rates, time remaining to maturity and the creditworthiness of the Issuer and Guarantor. The secondary market price may be lower than the market value of the issued Notes as at the Issue Date to take into account amounts paid to distributors and other intermediaries relating to the issue and sale of the Notes as well as amounts relating to the hedging of the Issuer's obligations. As a result of all of these factors, the holder may receive an amount in the secondary market which may be less than the then intrinsic market value of the Notes and which may also be less than the amount the holder would have received had the holder held the Notes through to maturity.

Potential Conflicts of Interest

Potential Conflict of Interest: The Determination Agent, which is an affiliate of the Issuer, will determine the payment to the investor at maturity. MSI plc and its affiliates may trade the Underlying on a regular basis as part of its general broker-dealer business and may also carry out hedging activities in relation to the Notes. Any of these activities could influence the Determination Agent's determination of adjustments made to any Notes and any such trading activity could potentially affect the price of the Underlying and, accordingly, could affect the investor's payment on any Notes.

Our affiliates may publish research that could affect the market value of the Notes: One or more of our affiliates may, at present or in the future, publish research reports with respect to movements in interest rates generally or the Reference Rate specifically. This research is modified from time to time without notice to you and may express opinions or provide recommendations that are inconsistent with purchasing or holding the Notes. Any of these activities may affect the market value of the Notes.

Hedging Risk: On or prior to and after the Trade Date, the Issuer, through its affiliates or others, will likely hedge its anticipated exposure under the Notes by taking positions in the Underlying, in option contracts on the Underlying or positions in any other available securities or instruments. In addition, the Issuer and its affiliates trade the Underlying as part of their general businesses. Any of these activities could potentially affect the value of the Underlying, and accordingly, could affect the payment to holders on the Notes.

Issuer Specific Risks

Credit Risk: Investors are exposed to the credit risk of the Issuer and Guarantor. The Notes are essentially a loan to the Issuer that the Issuer promises to pay to you at maturity (and that the Guarantor promises to pay if the Issuer fails to do so). There is the risk, however, that the Issuer and/or Guarantor may not be able to fulfil its promise to you. If any companies in the Morgan Stanley group incur losses with respect to any of their activities, this may have a negative impact on the financial condition of the Issuer and the Guarantor. You may lose all or part of your investment if the Issuer and/or Guarantor is unable to pay the coupons or the redemption amount and/or becomes insolvent. No assets of the Issuer or Guarantor are segregated and specifically set aside in order to pay the holders of the Notes in the event of the insolvency of the Issuer and/or Guarantor, and the holders of the Notes will rank behind creditors who have priority rights over certain assets of the Issuer.

Other Risks

Adjustments by the Determination Agent: The terms and conditions of the Notes will allow the Determination Agent to make adjustments or take any other appropriate action if circumstances occur where the Notes or any exchanges are affected by market disruption, adjustment events or circumstances affecting normal activities.

Tax and Accounting Considerations: Special tax and/or accounting considerations may apply to certain types of holders. Prospective investors are urged to consult with their own tax advisors and accounting advisors to determine any tax or accounting implications of this investment.

In purchasing any Notes, purchasers will be deemed to represent and undertake to the Issuer, the Dealer and each of their affiliates that (i) such purchaser understands the risks and potential consequences associated with the purchase of the Notes, (ii) that such purchaser has consulted with its own legal, regulatory, investment, accounting, tax and other advisers to extent it believes is appropriate to assist it in understanding and evaluating the risks involved in, and the consequences of, purchasing the Notes, and (iii) in accordance with the terms set out in Annex 1.

Morgan Stanley is not qualified to give legal, tax or accounting advice to its clients and does not purport to do so in this document. Clients are urged to seek the advice of their own professional advisers about the consequences of the provisions contained herein.
