Section D – Risks

Element	Title	
D.2	Key risks regarding the Issuer and the Guarantor:	<p>In purchasing Notes, investors assume the risk that the Issuer and the Guarantor may become insolvent or otherwise be unable to make all payments due in respect of the Notes. There is a wide range of factors which individually or together could result in the Issuer and the Guarantor becoming unable to make all payments due in respect of the Notes. It is not possible to identify all such factors or to determine which factors are most likely to occur, as the Issuer and the Guarantor may not be aware of all relevant factors and certain factors which they currently deem not to be material may become material as a result of the occurrence of events outside the Issuer's and the Guarantor's control. The Issuer and the Guarantor have identified a number of factors which could materially adversely affect their businesses and ability to make payments due under the Notes. These factors include:</p> <p>Risk Factors relating to the Issuer</p> <ul style="list-style-type: none"> • Issuer's dependence on the Guarantor to make payments on the Notes. • Certain considerations in relation to the forum upon insolvency of the Issuer. <p>Factors that may affect the Guarantor's ability to fulfil its obligations under the Guarantee</p> <p>Macroeconomic Risks</p> <ul style="list-style-type: none"> • Economic conditions in the countries where the Group operates could have a material adverse effect on the Group's business, financial condition and results of operations. • Since the Guarantor's loan portfolio is highly concentrated in Spain, adverse changes affecting the Spanish economy could have a material adverse effect on its financial condition. • Any decline in the Kingdom of Spain's sovereign credit ratings could adversely affect the Group's business, financial condition and results of operations. • The Group may be materially adversely affected by developments in the emerging markets where it operates. • The Group's earnings and financial condition have been, and its future earnings and financial condition may continue to be, materially affected by depressed asset valuations resulting from poor market conditions. • Exposure to the real estate market makes the Group vulnerable to developments in this market. <p>Legal, Regulatory and Compliance Risks</p> <ul style="list-style-type: none"> • The Group is subject to substantial regulation and regulatory and governmental oversight. Changes in the regulatory framework could have a material adverse effect on its business, results of operations and financial condition.

		<ul style="list-style-type: none"> • Increasingly onerous capital requirements may have a material adverse effect on the Guarantor's business, financial condition and results of operations. • Minimum requirement for own funds and eligible liabilities (MREL). Any failure by BBVA and/or the Group to comply with its MREL could have a material adverse effect on the Guarantor's business, financial condition and results of operations. • Increased taxation and other burdens imposed on the financial sector may have a material adverse effect on the Guarantor's business, financial condition and results of operations. • Contributions for assisting in the future recovery and resolution of the Spanish banking sector may have a material adverse effect on the Guarantor's business, financial condition and results of operations. • Regulatory developments related to the EU fiscal and banking union may have a material adverse effect on the Guarantor's business, financial condition and results of operations. • The Group's anti-money laundering and anti-terrorism policies may be circumvented or otherwise not be sufficient to prevent all money laundering or terrorism financing. • The Group is exposed to risk in relation to compliance with anti-corruption laws and regulations and sanctions programmes. • Local regulation may have a material effect on the Guarantor's business, financial condition, results of operations and cash flows. <p>Liquidity and Financial Risks</p> <ul style="list-style-type: none"> • The Guarantor has a continuous demand for liquidity to fund its business activities. The Guarantor may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. • Withdrawals of deposits or other sources of liquidity may make it more difficult or costly for the Group to fund its business on favourable terms or cause the Group to take other actions. • Implementation of internationally accepted liquidity ratios might require changes in business practices that affect the profitability of the Guarantor's business activities. • The Group's businesses are subject to inherent risks concerning borrower and counterparty credit quality which have affected and are expected to continue to affect the recoverability and value of assets on the Group's balance sheet. • The Group's business is particularly vulnerable to volatility in interest rates. • The Guarantor is dependent on its credit ratings and any reduction of its credit ratings could materially and adversely affect the Group's business, financial
