Definitions relating to the underlying(s) relevant for redemption, the performance of such underlying(s) and levels of such underlying(s)

A **redemption underlying** means the or each underlying specified as an underlying for the purpose of the redemption provisions in Element C.20 below.

[as "[best of] [worst of] observation" applies [and for the purpose of determining [if a redemption barrier event has occurred] [and] [the performance-linked redemption amount determined in accordance with the [put] [call] [call spread-put spread] [twin win] [market timer] [put call sum] option provisions below] (specify as relevant where more than one final performance formula applies)], the redemption underlying with the [highest] [lowest] (determined, if equal, by the calculation agent in accordance with the conditions) final performance]

[as "outperformance observation" provisions applies [and for the purpose of determining [if a redemption barrier event has occurred] [and] [the performance-linked redemption amount determined in accordance with the [put] [call] [call spread-put spread] [twin win] [market timer] [put call sum] option provisions

The **final performance** shall be determined in accordance with the:

["single underlying observation" provisions, meaning that the final performance in respect of the redemption underlying is, in the determination of the calculation agent, an amount expressed as a percentage equal to the redemption underlying's final reference level less its redemption strike level, all divided by its redemption initial level, expressed as a formula:

[Such redemption amount is subject to a [maximum amount (cap) of $[\bullet]$ [if a redemption [upper] barrier event has [not] occurred]] [minimum amount (floor) of $[\bullet]$ [if a redemption [upper] barrier event has [not] occurred]] [maximum amount of $[\bullet]$ (collar)] [if a redemption [upper] barrier event has [not] occurred] (specify for each barrier event where different)]

[The performance-linked redemption amount determined in accordance with the "call option provisions" means that the redemption amount will be a "call option" amount

[determined by the calculation agent to be the sum of (a) the calculation amount (CA) and (b) the product of the calculation amount (CA) and the final performance of the final performance underlying(s) (FPU) [multiplied by the final participation rate (FPR)] [multiplied by the fx perf] [all adjusted by the adjustment amount], expressed as a formula:

 $CA + (CA \times final performance of FPU[\times FPR][\times fx perf])[+adj]$

[The **final participation rate** or **FPR** is $[\bullet]$ % [if a redemption [upper] barrier event has [not] occurred (*specify for each barrier event where different*).] [The **adjustment amount** or **adj** is $[\bullet]$ [if a redemption [upper] barrier event has [not] occurred (*specify for each barrier event where different*).]

[Such redemption amount is subject to a [maximum amount (cap) of $[\bullet]$ [if a redemption [upper] barrier event has [not] occurred]] [minimum amount (floor) of $[\bullet]$ [if a redemption [upper] barrier event has [not] occurred]] [maximum amount of $[\bullet]$ (collar)] [if a redemption [upper] barrier event has [not] occurred] (specify for each barrier event where different)]]

[The performance-linked redemption amount determined in accordance with the "call spread – put spread option provisions" means that the redemption amount will be a "call spread put spread option" amount

[determined by the calculation agent to be (a) the calculation amount (CA) multiplied by (b) the call spread amount [multiplied by the call final participation rate (FPR call)] less the put spread amount [multiplied by the put final participation rate (FPR put)] [multiplied by (c) the global participation rate (GPR)] [multiplied by([c/d]) fx perf] [all adjusted by the adjustment amount], expressed as a formula:

 $CA \times [[Max([\bullet]\%, Min([\bullet]\%, Final Perf)) \\ [\times FPR put]] - [Min([\bullet]\%, Max([\bullet]\%, 100\% + Final Perf)) \\ [\times FPR call]]][+adj]$

[The **call final participation rate** or **FPR call** is [●]% [if a redemption [upper] barrier event has [not] occurred (*specify for each barrier event where different*)].] [The **put final participation rate** or **FPR put** is [●]% [if a redemption [upper] barrier event has [not] occurred (*specify for each barrier event where different*)].] [The **global participation rate** or **GPR** is [●]% [if a redemption [upper] barrier event has [not] occurred (*specify for each barrier event where different*)].] [The **adjustment amount** or **adj** is [●] [if a redemption [upper] barrier event has [not] occurred (*specify for each barrier event where different*).]

The **FinalPerf** means the final performance of the final performance underlying.

Therefore such redemption amount is subject to a maximum amount of $[\bullet]$ and minimum amount of $[\bullet]$ (a collar)].]

[The performance-linked redemption amount determined in accordance with the "twin win option provisions" means that the redemption amount will be a "twin win" amount

[determined by the calculation agent to be the product of (a) the calculation amount (CA) and (b) [•]% (being the "relevant percentage") and the absolute value (Abs) (meaning the positive percentage value of the percentage without regard to its sign) of the final performance of the final performance underlying(s) (FPU) [multiplied by the final participation rate (FPR)] [all multiplied by the fx perf] [all adjusted by the adjustment amount], expressed as a formula:

 $CA \times ([\bullet]\% + Abs[final performance of FPU [\times FPR]]) [\times fx perf][+adj]$

Such redemption amount is therefore subject to a minimum amount (floor) of [●].

[The **final participation rate** or **FPR** is [●]% [if a redemption [upper] barrier event has [not] occurred] (*specify for each barrier event where different*).] [The **adjustment amount** or **adj** is [●] [if a redemption [upper] barrier event has [not] occurred (*specify for each barrier event where different*).]

The performance-linked redemption amount determined in accordance with the "market timer option provisions" means that the redemption amount will be an amount

[determined by the calculation agent to be the product of (a) the calculation amount (CA) and (b) 100% plus (i) the product of the final participation rate (FPR) and (ii) the final performance of the final performance underlying(s) (FPU) and (ii) the market timer % [, all multiplied by the fx perf] [[and] all adjusted by the adjustment amount], expressed as a formula:

CA x $(100\% + FPR \times final performance of FPU + market timer \%)$ [× fx perf][+adj]

[The **adjustment amount** or **adj** is [●] [if a redemption [upper] barrier event has [not] occurred (*specify for each barrier event where different*).]

The **market timer** % is, in the determination of the calculation agent, an amount expressed as a percentage equal to such redemption underlying's redemption initial level less its market timer redemption initial level, all divided by its redemption initial level, expressed as a formula:

 $\frac{\text{redemption initial level} - \text{market timer redemption initial level}}{\text{redemption initial level}}$

[Such percentage is subject to a [maximum percentage (cap) of $[\bullet]$ %] [minimum percentage (floor) of $[\bullet]$ %] [maximum percentage of $[\bullet]$ % and a minimum percentage of $[\bullet]$ % (collar)]. (specify for each barrier event where different)]

[The **final participation rate** or **FPR** is $[\bullet]$ % [if a redemption barrier event has [not] occurred (*specify for each barrier event where different*)].]

[The performance-linked redemption amount determined in accordance with the "put call sum option provisions" means that the redemption amount will be a "put call sum option" amount

[determined by the calculation agent to be the product of the calculation amount (CA) and the sum of (a) [●]% (being the "relevant percentage") and the capped final performance of the final performance underlying(s) (FPU) [multiplied by the final participation rate (FPR)] and (b) the floored final performance of the final performance underlying(s) (FPU) [, all multiplied by the fx perf] [all adjusted by the adjustment amount], expressed as a formula:

```
CA \times ((([\bullet]\% + Min[[\bullet]\%, final\ performance\ of\ FPU])[\times\ FPR]) + Max([\bullet\%], final\ performance\ of\ FPU))[\times\ fx\ perf][+adj]
```

[The **final participation rate** or **FPR** is $[\bullet]$ % [if a redemption [upper] barrier event has [not] occurred (*specify for each barrier event where different*)].] [The **adjustment amount** or **adj** is $[\bullet]$ [if a redemption [upper] barrier event has [not] occurred.]

[Such redemption amount is subject to a [maximum amount (cap) of $[\bullet]$ [if a redemption [upper] barrier event has [not] occurred]] [minimum amount (floor) of $[\bullet]$ [if a redemption [upper] barrier event has [not] occurred]] [maximum amount of $[\bullet]$ and minimum amount of $[\bullet]$ (collar)] [if a redemption [upper] barrier event has [not] occurred] (specify for each barrier event where different).

[fx performance or **fx perf** means [the currency exchange rate specified as the underlying(s) being the fx perf in Element C.20 below on $[\bullet]$] [[a reciprocal fx rate meaning 1 divided by] the currency exchange rate for $[\bullet]$ into $[\bullet]$ published on $[\bullet]$ at $[\bullet]$ time on $[\bullet]$ [divided by the currency exchange rate for $[\bullet]$ into $[\bullet]$ published on $[\bullet]$ at $[\bullet]$ time on the relevant valuation date (as such fx is a cross-rate)] [(subject to adjustment – see "Disrupted Days, Market Disruption Events and Adjustments" below)] (fx final) divided by [the currency exchange rate specified as the underlying(s) being the fx perf in Element C.20 below on $[\bullet]$] [[a reciprocal fx rate meaning 1 divided by] the currency exchange rate for $[\bullet]$ into $[\bullet]$ published on $[\bullet]$ at $[\bullet]$ time on $[\bullet]$ [divided by the currency exchange rate for $[\bullet]$ into $[\bullet]$ published on $[\bullet]$ at $[\bullet]$ time on the relevant valuation date (as such fx is a cross-rate)] [(subject to adjustment – see "Disrupted Days, Market Disruption Events and Adjustments" below)] (fx initial).]

The calculation amount or CA is $[\bullet]$.

SECTION D - RISKS

Element	Title	
D.2	Key risks regarding the Issuers	[Citigroup Inc.][CGMFL] believes that the factors summarised below may affect its ability to fulfil its obligations under the Notes. All of these factors are contingencies which may or may not occur and [Citigroup Inc.][CGMFL] is not in a position to express a view on the likelihood of any such contingency occurring.
		There are certain factors that may affect [CGMFL's/Citigroup Inc.'s] ability to fulfil its obligations under any Notes issued by it [and CGML's ability to fulfil its obligations as guarantor in respect of Notes issued by CGMFL], including that such ability is dependent on the earnings of Citigroup Inc.'s subsidiaries, that Citigroup Inc. may be required to apply its available funds to support the financial position of its banking subsidiaries, rather than fulfil its obligations under the Notes, that Citigroup Inc.'s business may be affected by economic conditions, credit, market and market liquidity risk, by competition, country risk, operational risk, fiscal and monetary policies adopted by relevant regulatory authorities, reputational and legal risks and certain regulatory considerations.
		[There are certain additional factors that may affect CGMFL's ability to fulfil its obligations under the Notes issued by it, including that such ability is dependent on the group entities to which it on-lends the funds raised through the issue of the Notes performing their obligations in respect of such funding in a timely manner. In addition, such ability and CGML's ability to fulfil its obligations as guarantor in respect of Notes issued by CGMFL is dependent on economic conditions, credit, market and market liquidity risk, by competition, country risk, operational risk, fiscal and monetary policies adopted by relevant regulatory authorities, reputational and legal risks and certain regulatory considerations.]
D.3	Key risks regarding the Notes	Investors should note that the Notes (including Notes that are expressed to redeem at par or above) are subject to the credit risk of [CGMFL and CGML][Citigroup Inc.]. Furthermore, the Notes may be sold, redeemed or repaid early, and if so, the price for which a Note may be sold, redeemed or

Element	Title	
		repaid early may be less than the investor's initial investment. There are other certain factors which are material for the purpose of assessing the risks associated with investing in any issue of Notes, which include, without limitation, (i) risk of disruption to valuations, (ii) adjustment to the conditions, substitution of the relevant underlying(s) and/or early redemption following an adjustment event or an illegality, (iii) postponement of interest payments and/or minimum and/or maximum limits imposed on interest rates, (iv) cancellation or scaling back of public offers or the issue date being deferred, (v) hedging activities of the Issuer and/or any of its affiliates, (vi) conflicts of interest between the Issuer and/or any of its affiliates and holders of Notes, (vii) modification of the terms and conditions of Notes by majority votes binding all holders, (viii) discretions of the Issuer and Calculation Agent being exercised in a manner that affects the value of the Notes or results in early redemption, (ix) change in law, (x) illiquidity of denominations consisting of integral multiples, (xi) payments being subject to withholding or other taxes, (xii) fees and commissions not being taken into account when determining secondary market prices of Notes, (xiii) there being no secondary market, (xiv) exchange rate risk, (xv) market value of Notes being affected by various factors independent of the creditworthiness of [CGMFL and CGML][Citigroup Inc.] such as market conditions, interest and exchange rates and macro-economic and political conditions and (xvi) credit ratings not reflecting all risks. See also Element D.6 below
D.6	Key risks regarding the Notes and risk warning	INVESTORS MAY LOSE THEIR ENTIRE INVESTMENT OR PART OF IT AS THE CASE MAY BE. [CITIGROUP INC.][CGMFL] DOES NOT REPRESENT THAT THE LIST BELOW IS COMPREHENSIVE. PROSPECTIVE INVESTORS SHOULD READ THE BASE PROSPECTUS IN ITS ENTIRETY AND FORM THEIR OWN CONCLUSIONS REGARDING [CITIGROUP INC.][CGMFL]. An investment in Notes may entail significant risks and risks that are not associated with an investment in a debt instrument with a fixed principal amount and which bears interest at either a fixed rate or at a floating rate determined by reference to published interest rate references. The risks include, without limitation, the possibility of significant changes in the prices of the relevant underlying(s). Such risks generally depend on factors over which [CGMFL and CGML][Citigroup Inc.] do[es] not have control and which cannot readily be foreseen, such as economic and political events and the supply of and demand for the relevant underlying(s). In recent years, currency exchange rates and prices for various underlying(s) have been highly volatile, and such volatility may be expected in the future. Fluctuations in any such rates or prices that have occurred in the past are not necessarily indicative, however, of fluctuations that may occur during the term of the Notes. The risk of loss as a result of the linkage to the relevant underlying(s) can be substantial.

This Summary contains all the Elements required to be included in a summary for Notes, the Issuer and the Guarantor (where the Issuer is CGMFL). Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements. Even though an Element may be required to be inserted in a summary because of the type of securities, issuer and guarantor, it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element should be included in the summary explaining why it is not applicable.

If the Notes are redeemed early, only the mandatory early redemption amount is payable and no further amount shall be due or assets deliverable. The redemption amount payable at maturity depends on the performance of the relevant underlying(s). See also Element C.18 above.

The mandatory early redemption amount due on the relevant mandatory early redemption date if a mandatory early redemption event occurs will be determined in accordance with the mandatory early redemption provisions as follows

Mandatory early redemption

If (and only if), in respect of a mandatory early redemption date, a mandatory early redemption barrier event has occurred and as no "MER upper barrier event" is specified, the Notes will be redeemed on the relevant mandatory early redemption date at an amount for each calculation amount equal to the amount specified as the MER amount for the relevant mandatory early redemption (MER) date in the Table below.

If the Notes are redeemed early, only the relevant mandatory early redemption amount shall be payable and no further amounts shall be paid or assets deliverable.

Definitions relating to mandatory early redemption:

The MER barrier level is, in respect of a MER date,

the percentage specified for such MER date in the Table below.

TABLE

MER barrier level (%)	MER barrier observation date	MER amount	MER date
100% of the MER initial level of the relevant MER barrier underlying	2 March 2015	EUR1,030	10 March 2015

 - (I) if a redemption upper barrier event has occurred (meaning that the underlying closing level of the redemption underlying(s) on the redemption upper barrier event valuation date is equal to or greater than 100% (being the redemption upper barrier percentage) of the redemption initial level for the relevant redemption underlying(s), the redemption amount due where an upper barrier event only has occurred being EUR1,240; OR
 - (II) if a redemption upper barrier event has not occurred, the redemption amount due where neither an upper barrier event nor a redemption barrier event has occurred, being EUR1,000; OR
- (O) a redemption barrier event has occurred, then the redemption amount due where a redemption barrier event only has occurred in respect of each calculation amount will be the performance-linked redemption amount determined in accordance with the put option provisions below.

<u>Definitions</u> relating to the underlying(s) relevant for redemption, the performance of such underlying(s) and levels of such underlying(s)

A **redemption underlying** means the or each underlying specified as an underlying for the purpose of the redemption provisions in Element C.20

above.

The final performance underlying(s) or (FPU) is,

as "single underlying observation" applies, the redemption underlying

The **final performance** shall be determined in accordance with the:

"single underlying observation" provisions, meaning that the final performance in respect of the redemption underlying is, in the determination of the calculation agent, an amount expressed as a percentage equal to the redemption underlying's final reference level less its redemption strike level, all divided by its redemption initial level, expressed as a formula:

final reference level – redemption strike level redemption initial level

The **redemption strike level** for a redemption underlying is zero

The **final reference level** means, in respect of a final valuation date or, as the case may be, final valuation dates and the or each redemption underlying:

for the purpose of determining if a redemption barrier event has occurred and the performance-linked redemption amount determined in accordance with the put option provisions below "closing level on final valuation date", being the underlying closing level for such redemption underlying on such final valuation date

The **redemption initial level** means, in respect of a final valuation date or, as the case may be, final valuation dates and the or each redemption underlying:

for the purpose of determining if a redemption barrier event has occurred and the performance-linked redemption amount determined in accordance with the put option provisions below "closing level on redemption strike date", being the underlying closing level for such redemption underlying for the redemption strike date

Definitions relating to the determination of the barrier event

A **redemption barrier event** will occur if, in the determination of the calculation agent,

on the related redemption barrier observation date, the underlying closing level of the redemption underlying (the "redemption barrier underlying(s)") is less than the final barrier level ("redemption barrier event european closing observation").

The **final barrier level** is 75% of the redemption initial level of the relevant redemption barrier underlying.

<u>Definitions relating to the determination of the performance-linked redemption amount due</u>

The performance-linked redemption amount determined in accordance with the "put option provisions" means that the redemption amount will be a "put option" amount

determined by the calculation agent to be the product of the calculation amount (CA) and the sum of zero% (being the "relevant percentage") and the final performance of the final performance underlying(s) (FPU) (which will be less than the calculation amount), expressed as a formula:

CA ×(zero% + final performance of FPU)

The **calculation amount** or **CA** is EUR1,000.

SECTION D - RISKS

Element	Title	
D.2	Key risks regarding the Issuers	Citigroup Inc. believes that the factors summarised below may affect its ability to fulfil its obligations under the Notes. All of these factors are contingencies which may or may not occur and Citigroup Inc. is not in a position to express a view on the likelihood of any such contingency occurring.
		There are certain factors that may affect Citigroup Inc.'s ability to fulfil its obligations under any Notes issued by it, including that such ability is dependent on the earnings of Citigroup Inc.'s subsidiaries, that Citigroup Inc. may be required to apply its available funds to support the financial position of its banking subsidiaries, rather than fulfil its obligations under the Notes, that Citigroup Inc.'s business may be affected by economic conditions, credit, market and market liquidity risk, by competition, country risk, operational risk, fiscal and monetary policies adopted by relevant regulatory authorities, reputational and legal risks and certain regulatory considerations.
D.3	Key risks regarding the Notes	Investors should note that the Notes (including Notes that are expressed to redeem at par or above) are subject to the credit risk of Citigroup Inc Furthermore, the Notes may be sold, redeemed or repaid early, and if so, the price for which a Note may be sold, redeemed or repaid early may be less than the investor's initial investment. There are other certain factors which are material for the purpose of assessing the risks associated with investing in any issue of Notes, which include, without limitation, (i) risk of disruption to valuations, (ii) adjustment to the conditions, substitution of the relevant underlying(s) and/or early redemption following an adjustment event or an illegality, (iii) postponement of interest payments and/or minimum and/or maximum limits imposed on interest rates, (iv) cancellation or scaling back of public offers or the issue date being deferred, (v) hedging activities of the Issuer and/or any of its affiliates, (vi) conflicts of interest between the Issuer and/or any of its affiliates and holders of Notes, (vii) modification of the terms and conditions of Notes by majority votes binding all holders, (viii) discretions of the Issuer and Calculation Agent being exercised in a manner that affects the value of the Notes or results in early redemption, (ix) change in law, (x) illiquidity of denominations consisting of integral multiples, (xi) payments being subject to withholding or other taxes, (xii) fees and commissions not being taken into account when determining secondary market prices of Notes, (xiii) there being no secondary market, (xiv) exchange rate risk, (xv) market value of Notes being affected by various factors independent of the creditworthiness of Citigroup Inc. such as market

		conditions, interest and exchange rates and macro-economic and political
		conditions and (xvi) credit ratings not reflecting all risks.
		See also Element D.6 below
D.6	Key risks regarding the Notes and risk warning	INVESTORS MAY LOSE THEIR ENTIRE INVESTMENT OR PART OF IT AS THE CASE MAY BE. CITIGROUP INC. DOES NOT REPRESENT THAT THE LIST BELOW IS COMPREHENSIVE. PROSPECTIVE INVESTORS SHOULD READ THE BASE PROSPECTUS IN ITS ENTIRETY AND FORM THEIR OWN CONCLUSIONS REGARDING CITIGROUP INC
		An investment in Notes may entail significant risks and risks that are not associated with an investment in a debt instrument with a fixed principal amount and which bears interest at either a fixed rate or at a floating rate determined by reference to published interest rate references. The risks include, without limitation, the possibility of significant changes in the prices of the relevant underlying(s). Such risks generally depend on factors over which Citigroup Inc. does not have control and which cannot readily be foreseen, such as economic and political events and the supply of and demand for the relevant underlying(s). In recent years, currency exchange rates and prices for various underlying(s) have been highly volatile, and such volatility may be expected in the future. Fluctuations in any such rates or prices that have occurred in the past are not necessarily indicative, however, of fluctuations that may occur during the term of the Notes. The risk of loss as a result of the linkage to the relevant underlying(s) can be substantial.
